

## Sign Base Wheel Assembly

### Assembly Kit Includes:

One rod  
Two wheels  
Two caps  
Two brackets  
Four Philips head screws  
Two 7/16 bolts

### You will need:

A Philips screwdriver  
Ratchet with a 7/16 socket

## Assembly Instructions

1. Place one of cap on one end of the rod and snap into place.
2. Add wheels to rod and snap other cap into place on the end without a cap.
3. Push wheels so they against the caps. They will be on the outside of the sign base.
4. Place rod in grooves on bottom of sign base.
5. Place the brackets over the rod as indicated by the drilled out holes, tighten the four (4) Philips head screws into place.
6. On other end use the rubber coated round disks. Center one in each of corner and using one of the 7/16 screws tighten into place.
7. Repeat step six (6) on the other corner.
