

Made in the USA

## Bumper Post Sleeve Quick & Easy Installation

1. Slide the Ideal Sleeve over the existing post to see how well the sleeve fits. Sleeve inside diameter is always bigger than the pipe size.
2. Apply neoprene adhesive tape approximately 3” down from the top of the post allowing for a 1” gap between the ends of the tape. At the bottom of the post, wrap the tape all the way around.
3. With a twisting motion, slowly slide the Ideal Sleeve over the post. If the tape is applied correctly you will hear air being forced out of the sleeve.
4. The Ideal Sleeve will fit and will not be easily removed. If it does come off easily, repeat step two and apply another layer of neoprene tape on top of the previous layer.
