

Protect Your Equipment and Workers With the Ideal Shield Wall Guard System

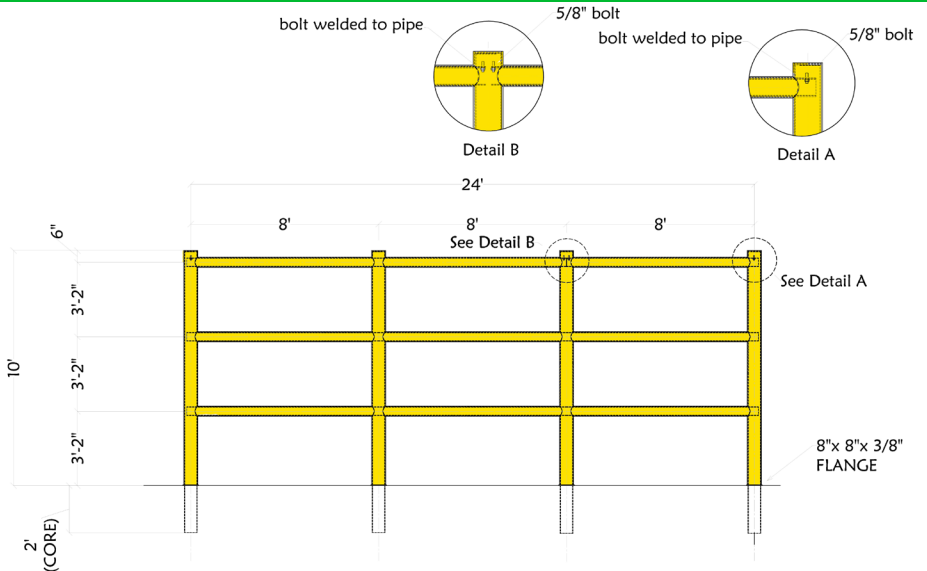

Maximizes Facility Floor Space

Open Wall for Increased Air Flow

Custom Designed for Your Storage Needs

Why Choose Ideal Shield Wall Guard Systems?

Maximizes Floor Space Custom designed vertical storage solutions for inventory and equipment • frees up facility floor space • open wall allows for easy access to inventory • removable and reusable as floor plans change

Reduces Maintenance Steel pipe covered in durable HDPE plastic • will not fade, peel, or crack - looks new for years to come • **Never Paint Again!**

Easy to install Modularly assembled • installation systems include core mount and steel floor sleeve for added strength • no on-site welding or hot-work needed • significantly reducing installation labor costs

Strongest Protection Available Steel walls offer strongest protection available • custom post and rail spacing designed specifically for your storage and accessibility needs • protects workers, inventory, and equipment • clearly defines facility floor space
